

It organizes May 23, 2025 from the New Economy cycle
XIII Traditional Scientific Conference on the subject:

*"The Innovative Economy in Times of Global Challenges:
New Approaches to Growth and a Sustainable Future"*

INVITATION

Oikos Institute – Research Center Bijeljina *and the host co-organizer*, University of National and World Economy from Sofia, Bulgaria, along with *other co-organizers* from Ukraine, Kazakhstan, Montenegro, Bosnia and Herzegovina, Georgia, and others, are organizing the thirteenth (XIII) international scientific conference of special importance, which will be held on May 23, 2025, in Sofia, Bulgaria.

"Innovative Economy in Times of Global Challenges: New Approaches to Growth and a Sustainable Future"

The main content/sectoral topics within the main cognitive framework that authors could explore are as follows:

- *"Innovations as the Driver of Global Growth: Transforming the Economy through Technology and Sustainability"*
- *"The Innovation Revolution: Reshaping the Global Economy through Creativity and Sustainability"*
- *"New Economic Models for Global Stability: The Role of Innovation in a Sustainable Economy"*
- *"Innovation and Social Economy: Catalysts for Progressive Global Growth"*
- *"Reshaping the Global Economy: Innovation, Adaptability, and Sustainability"*

EXPLANATION

This year's theme was developed in collaboration with our scientific board and their ongoing collaborators.

The theme, "*Innovative Economy in Times of Global Challenges: New Approaches to Growth and a Sustainable Future*," is highly relevant and socially justified, as it addresses key issues shaping contemporary economic development. In a world facing challenges such as climate change, technological revolutions, and the need for sustainable development, innovation becomes a critical factor in building the future global economy.

The global economy is undergoing deep transformations, and the challenges we face require new approaches, particularly in the context of digitalization, automation, and the green economy. Our ability to leverage innovations in technology and sustainable practices as drivers of growth will be crucial in our ability to address these challenges.

This theme provides space to explore various innovations that can shape the economic landscape of the future, whether through new technologies, business models, or sustainable practices. The proposed contents aim to inspire new perspectives and approaches in analyzing the role of innovation in global economic growth and sustainability, without imposing strict limitations. Our goal is to encourage a deeper understanding of how technology and sustainability can be linked to growth and the stability of the global economy.

DEAR AUTHORS-PARTICIPANTS

As usual, six months in advance, we invite you to the traditional spring scientific symposium, organized by the Oikos Institute, with the support of the host co-organizer, the University of National and World Economy from Sofia, Bulgaria, as well as other co-organizers from Ukraine, Kazakhstan, Montenegro, Bosnia and Herzegovina, Georgia, and other countries.

The symposium will traditionally be held in late spring, specifically on May 23, 2025, in Sofia, Bulgaria.

In the hope that you will join us, we extend our warm and collegial greetings.

The title, abstract, and keywords should be submitted to:

e-mail: novi.economics.institut@gmail.com

info@oikosinstitut.org

until 15.03.2025.

<https://economicsrs.com/index.php/eier/login>

Deadline for submission of complete articles is 15. 04. 2025.

<https://economicsrs.com/index.php/eier/login>

Selected articles that undergo anonymous double-blind review and meet the standards of **Scopus** and **ESCI**, in accordance with writing and citation guidelines, as well as agreement and alignment with the authors, will be published in journals indexed in Scopus..
